

## Membuat manual book dengan HELPANDDOC

1. Siapkan software "HelpAndDoc.exe" (download di internet)
2. Siapkan software "HtmlHelp.exe" (download di internet)
3. install kedua software tersebut
4. jalankan aplikasi helpanddoc
5. pilih new project

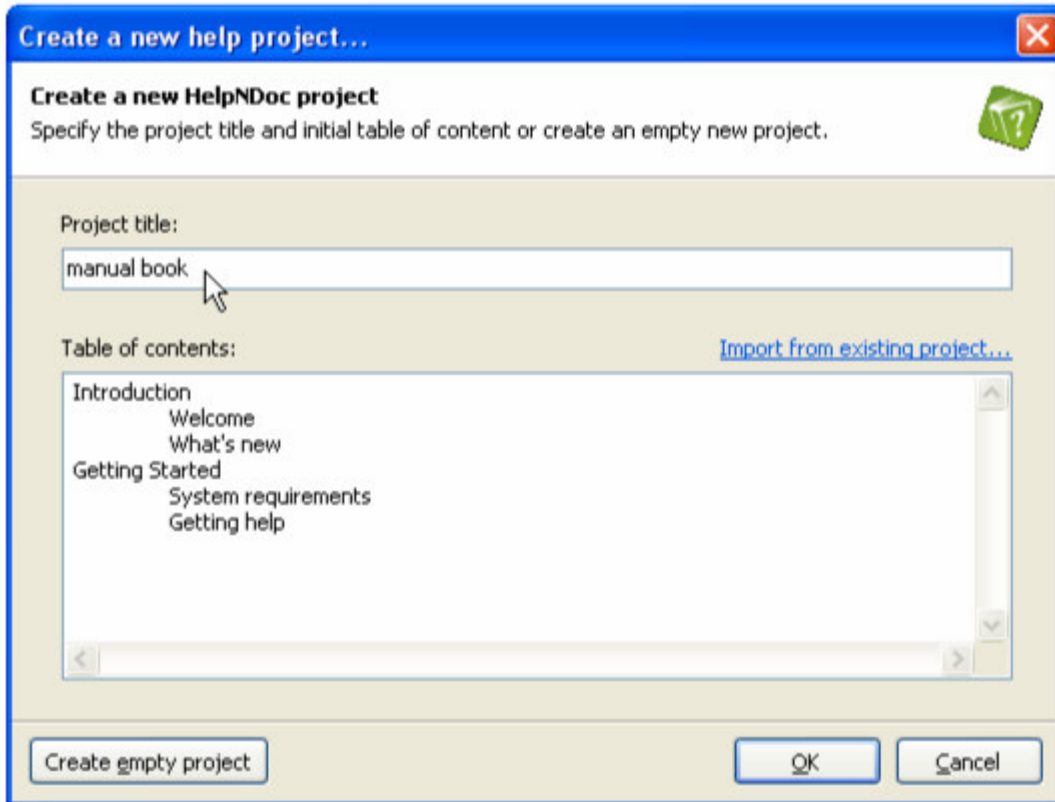

### New Project

Create a new empty HelpNDoc project

### Open Project

Open an existing HelpNDoc project

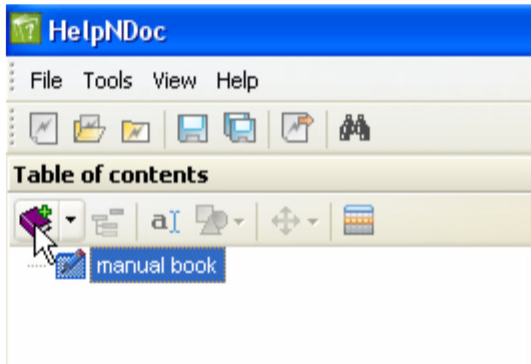

6. tulis judul project

7. hapus bagian-bagian yang tidak diperlukan

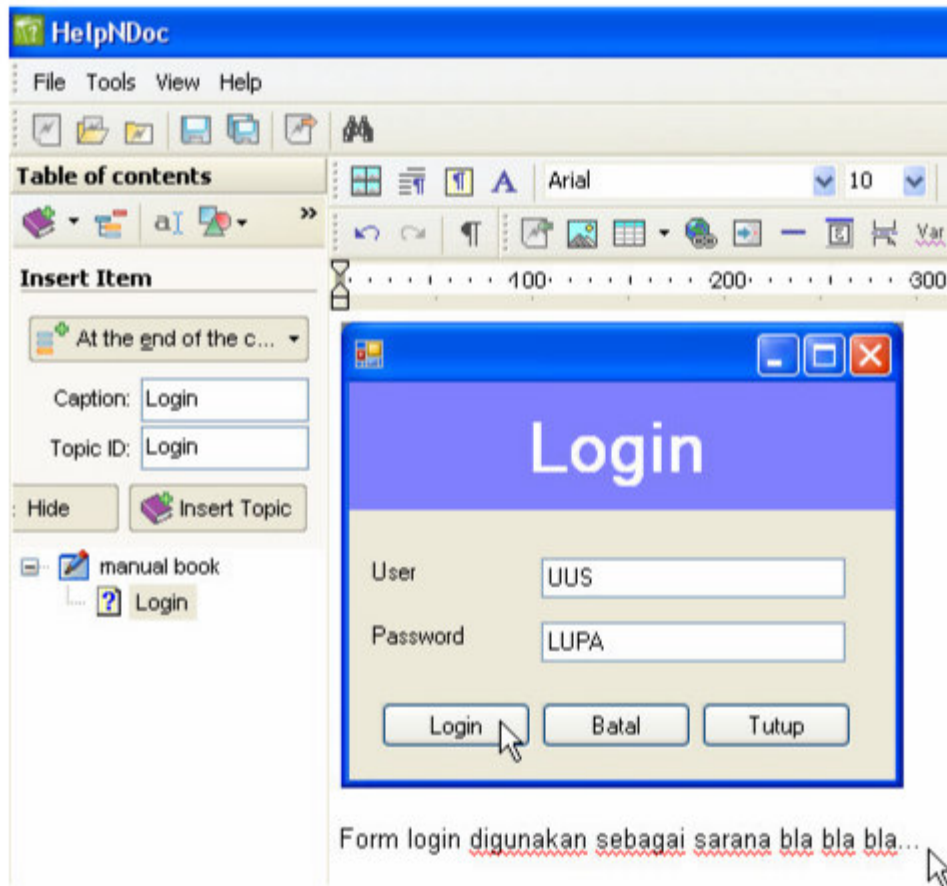

8. buatlah item baru

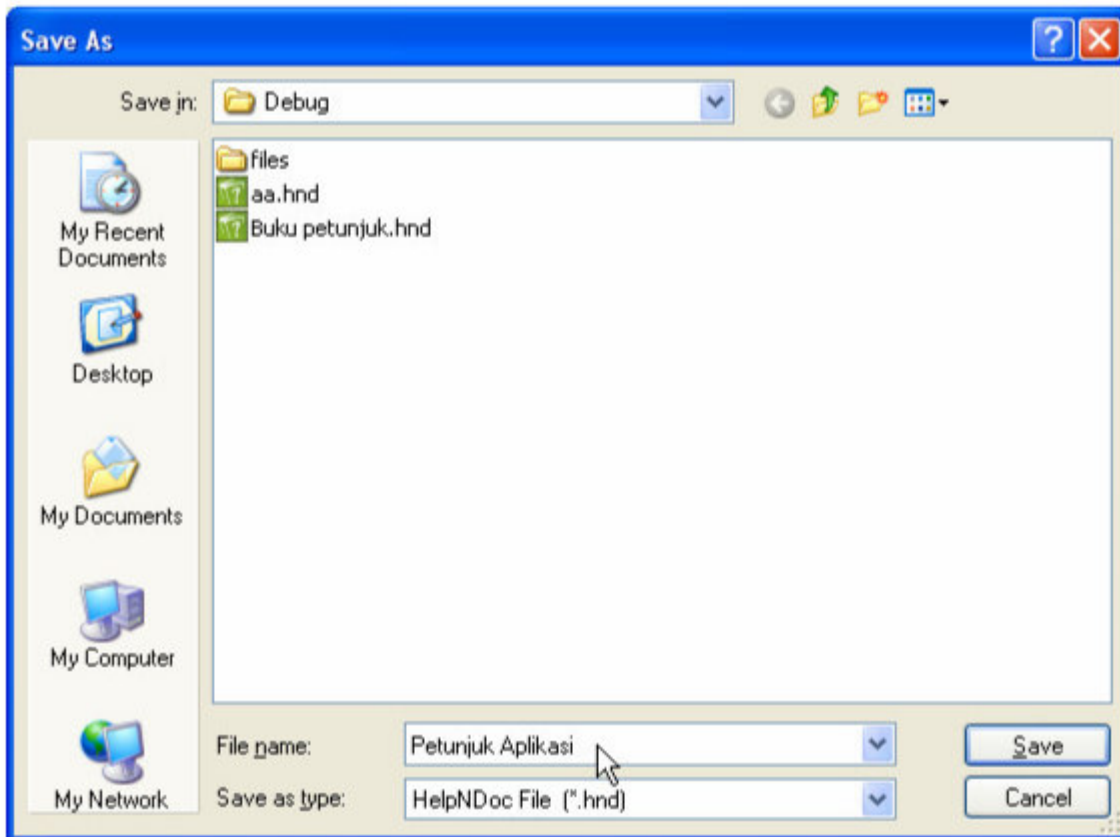

9. tulis nama item, lalu klik insert topic

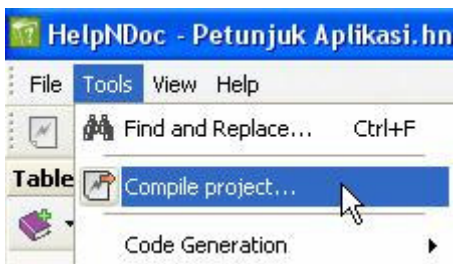

10. capture sebuah form, kemudian berikan penjelasan secukupnya

11. lakukan langkah2 ini berulang-ulang sehingga penjelasan cara menggunakan aplikasi yang anda bangun cukup memadai
12. simpan dan beri nama project di folder tertentu

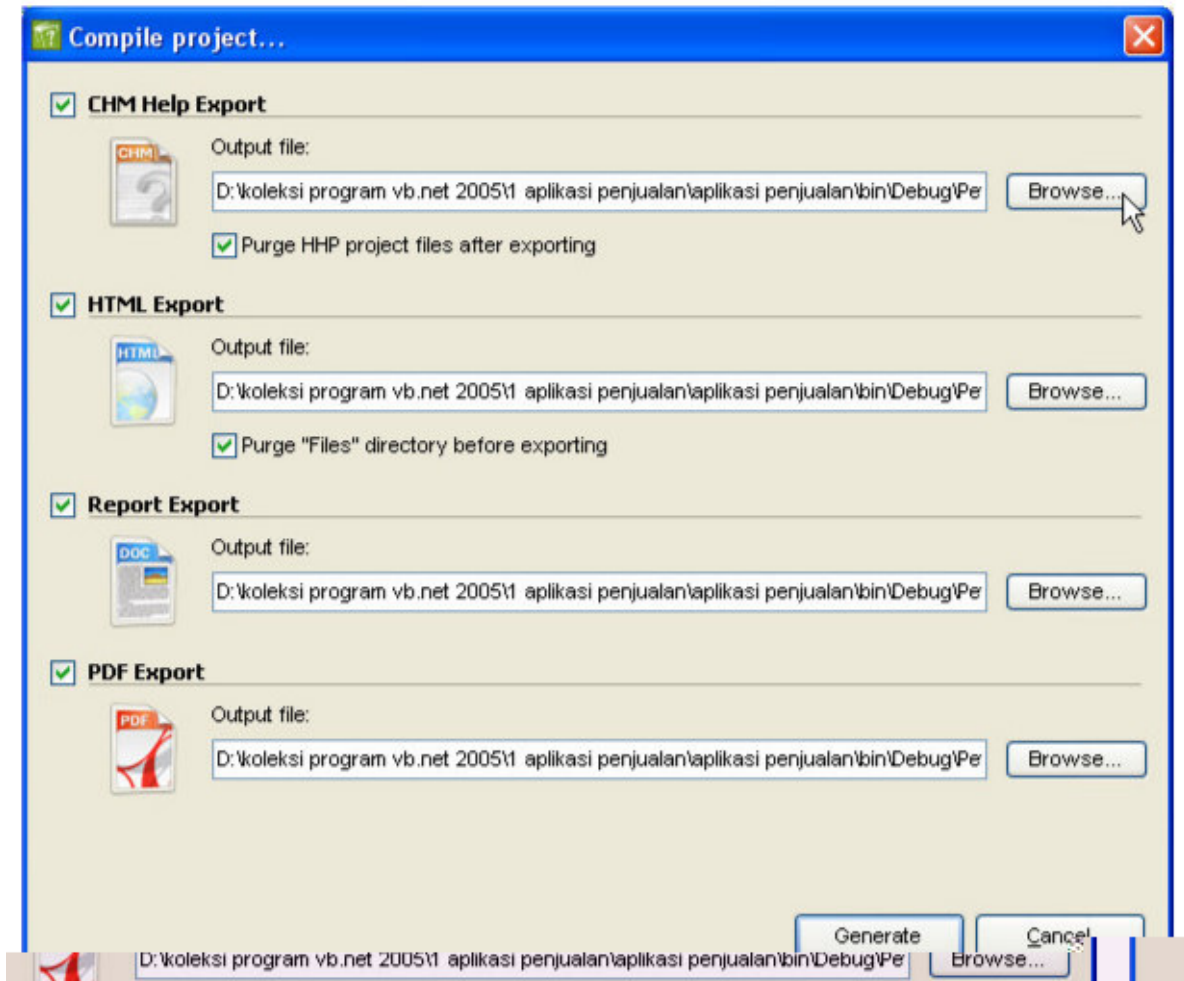

13. lakukan compile project

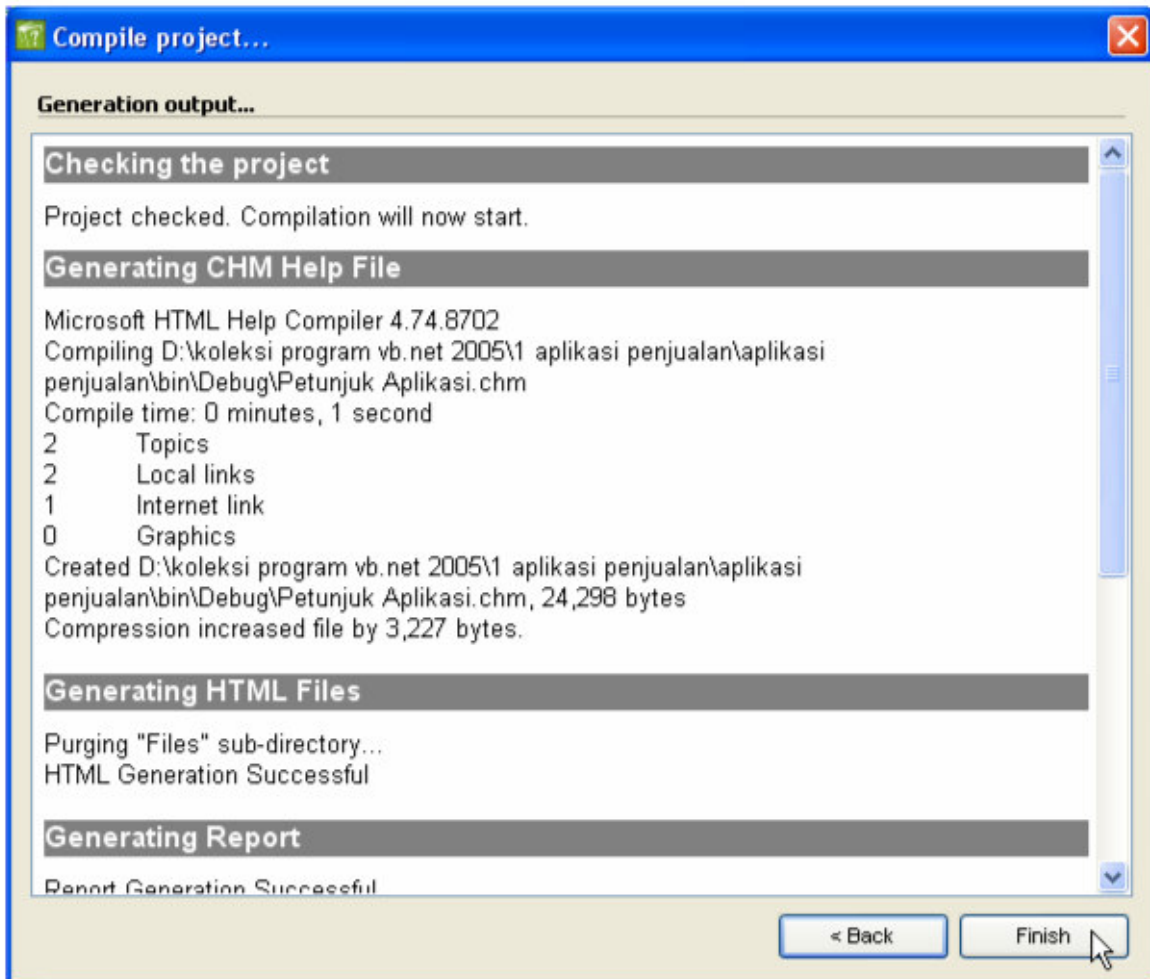

14. tentukan posisi hasil compile untuk masing-masing file (cmh, htm, doc dan pdf)

15. kemudian klik button generate

16. hasil compile

17. klik finish
18. jika file chm akan dipanggil di vb 6.0 maka inilah codingnya

```
Private Declare Function ShellExecute _  
    Lib "shell32.dll" _  
    Alias "ShellExecuteA" ( _  
        ByVal hwnd As Long, _  
        ByVal lpOperation As String, _  
        ByVal lpFile As String, _  
        ByVal lpParameters As String, _  
        ByVal lpDirectory As String, _  
        ByVal nShowCmd As Long) _  
    As Long
```

```
Private Sub Command2_Click()  
    ShellExecute 0, "open", "hh.exe", App.Path + "\Petunjuk Aplikasi.chm", "", 1  
End Sub
```

19. jika file chm akan dipanggil di vb.net maka inilah codingnya

```
Private Sub ManualBookToolStripMenuItem_Click(ByVal sender  
As System.Object, ByVal e As System.EventArgs) Handles  
ManualBookToolStripMenuItem.Click
```

```
System.Windows.Forms.Help.ShowHelp(Me, "Petunjuk Aplikasi.chm")
```

```
End Sub
```
