

Membuat Laporan Crystal Report Dengan Database Sql Server

Salah satu caranya adalah sebagai berikut :

Membuat DSN terlebih dahulu

Klik menu start

Pilih control panel

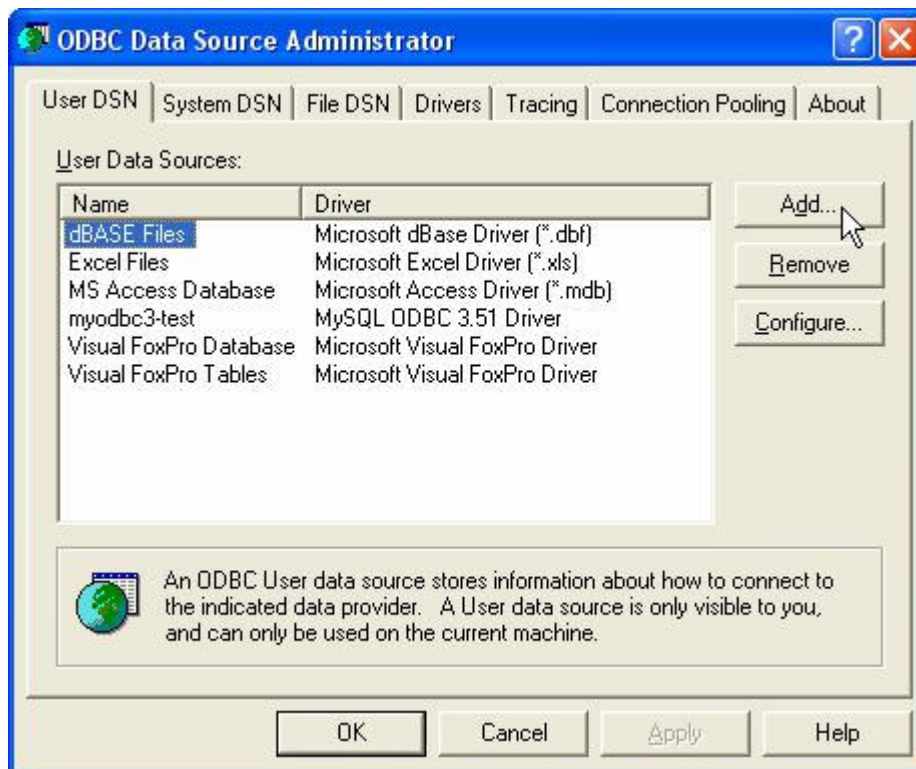

Klik dua kali administrative tool

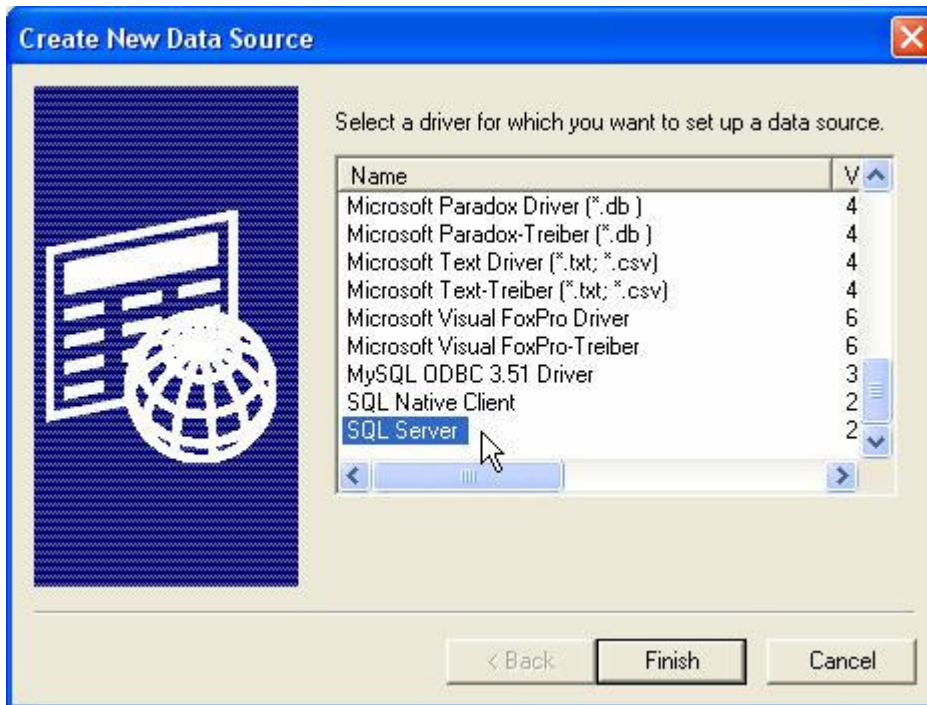

Klik dua kali datasource (ODBC)

Klik command Add

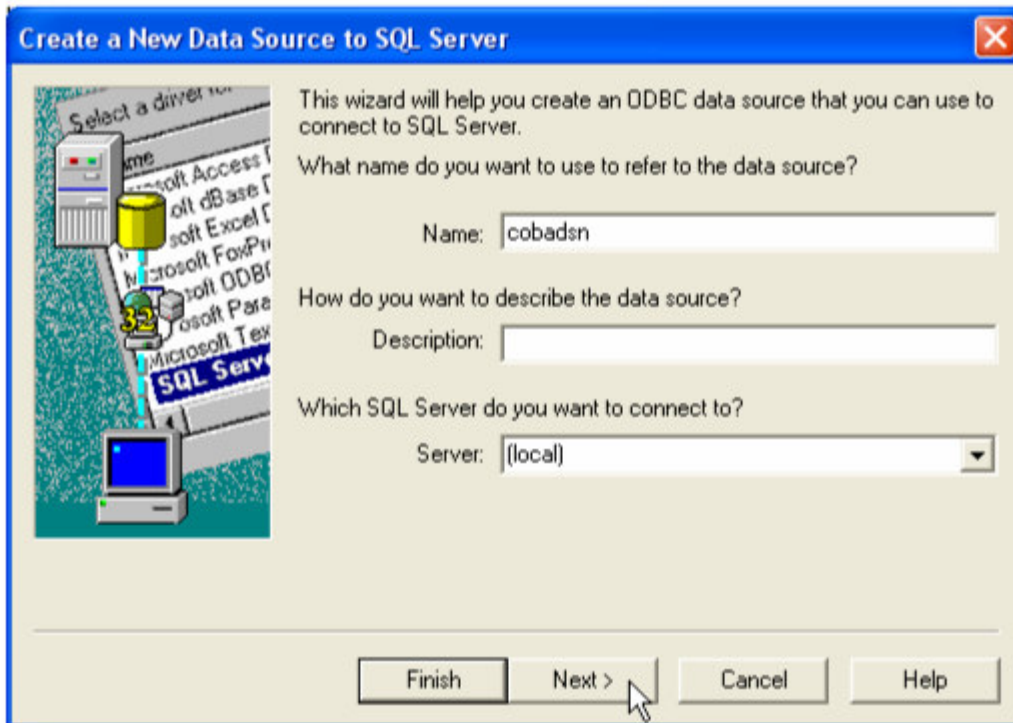

Pilih SQL server (biasanya paling bawah)

Tulis nama DSN (misalnya : cobadsn)

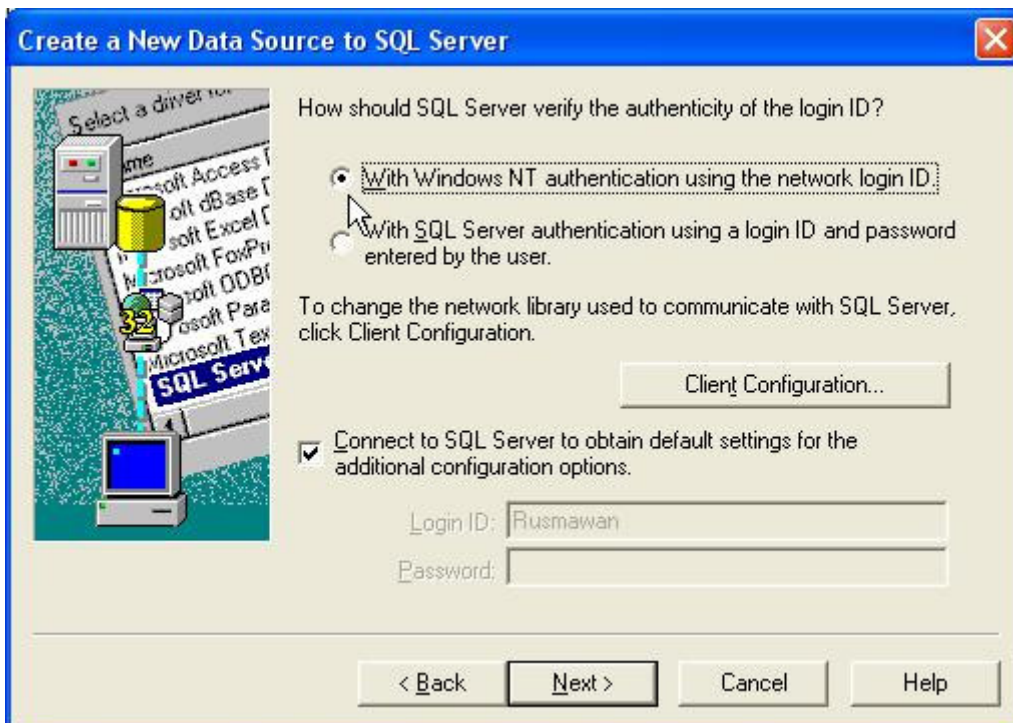

Tulis nama server anda atau ketik saja (local)

Klik next

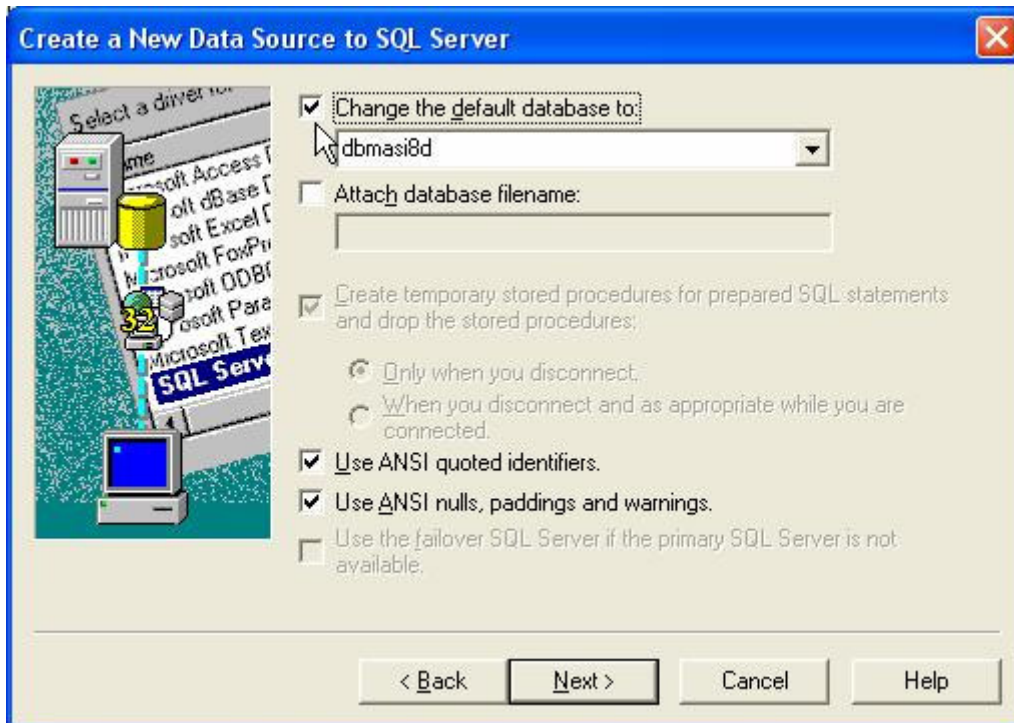

Pilih With windows NT

Klik next

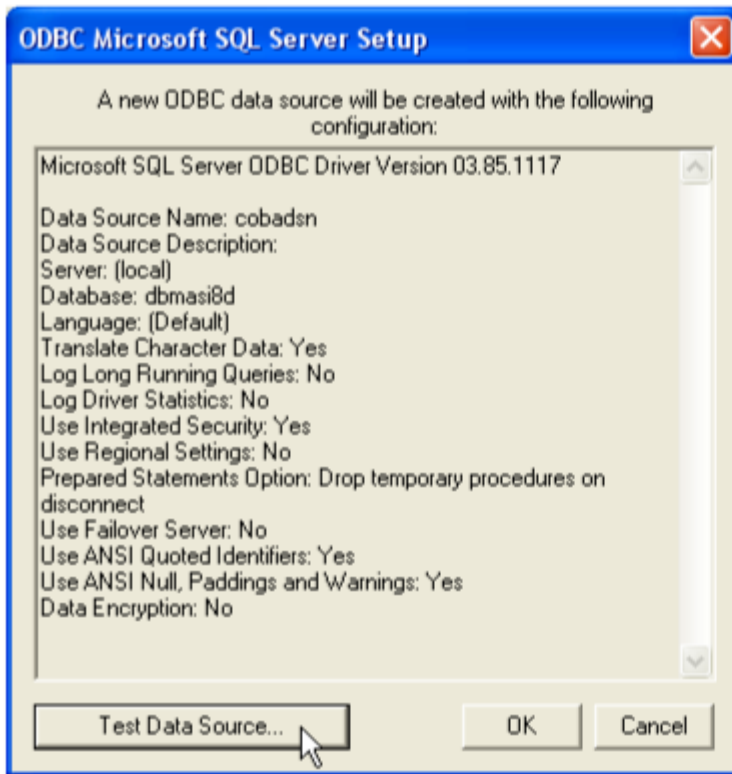

Tentukan database targetnya

Klik next

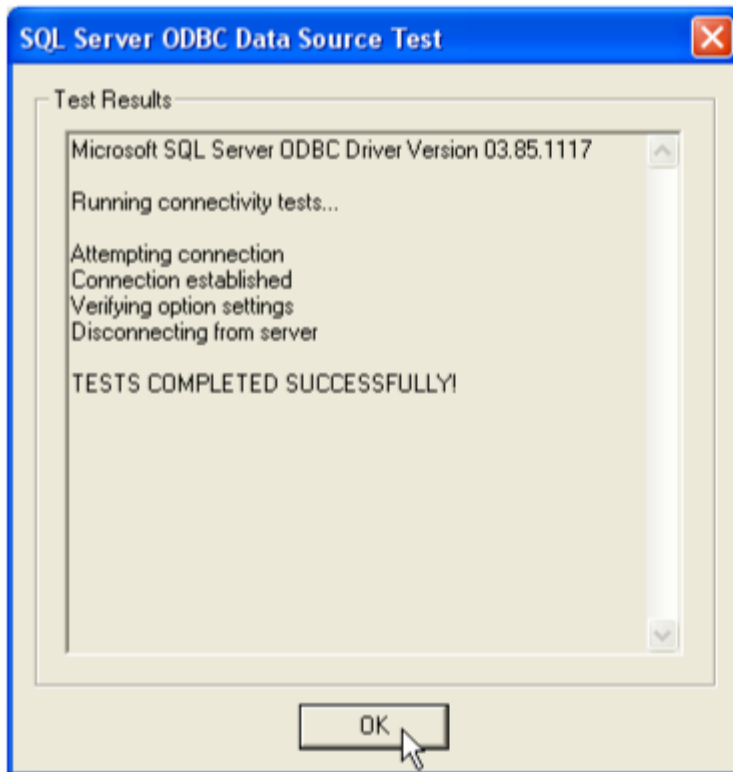

Klik finish

Klik test data source

Klik OK

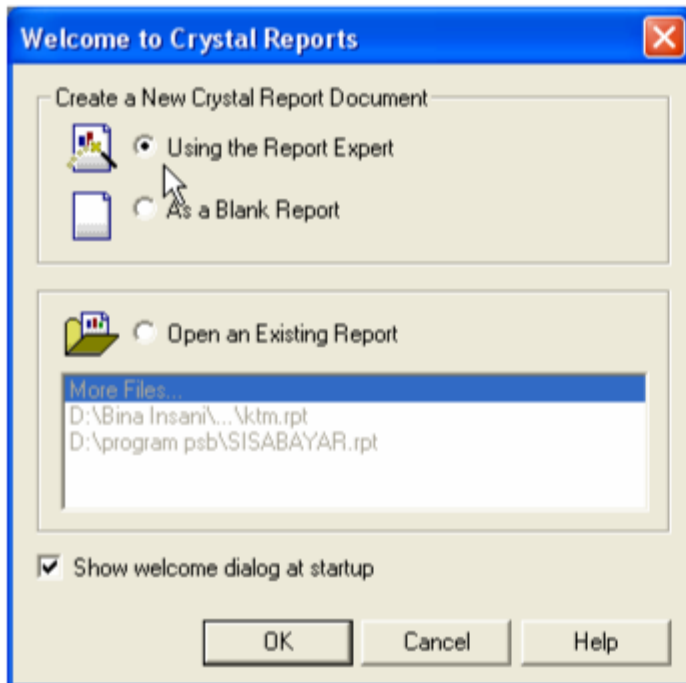

Klik OK

Klik OK

Aktifkan Crystal report

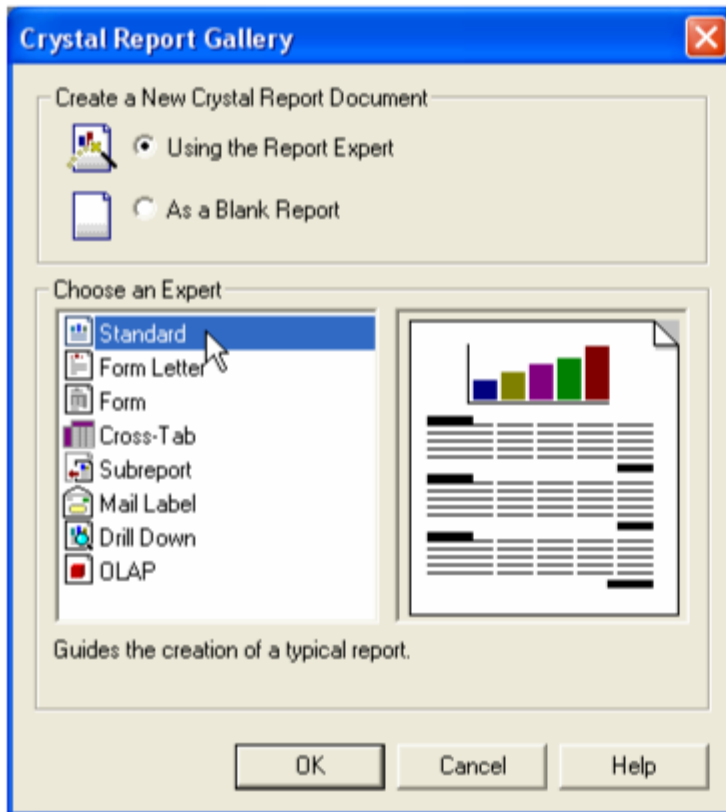

Pilih use the report expert

Klik OK

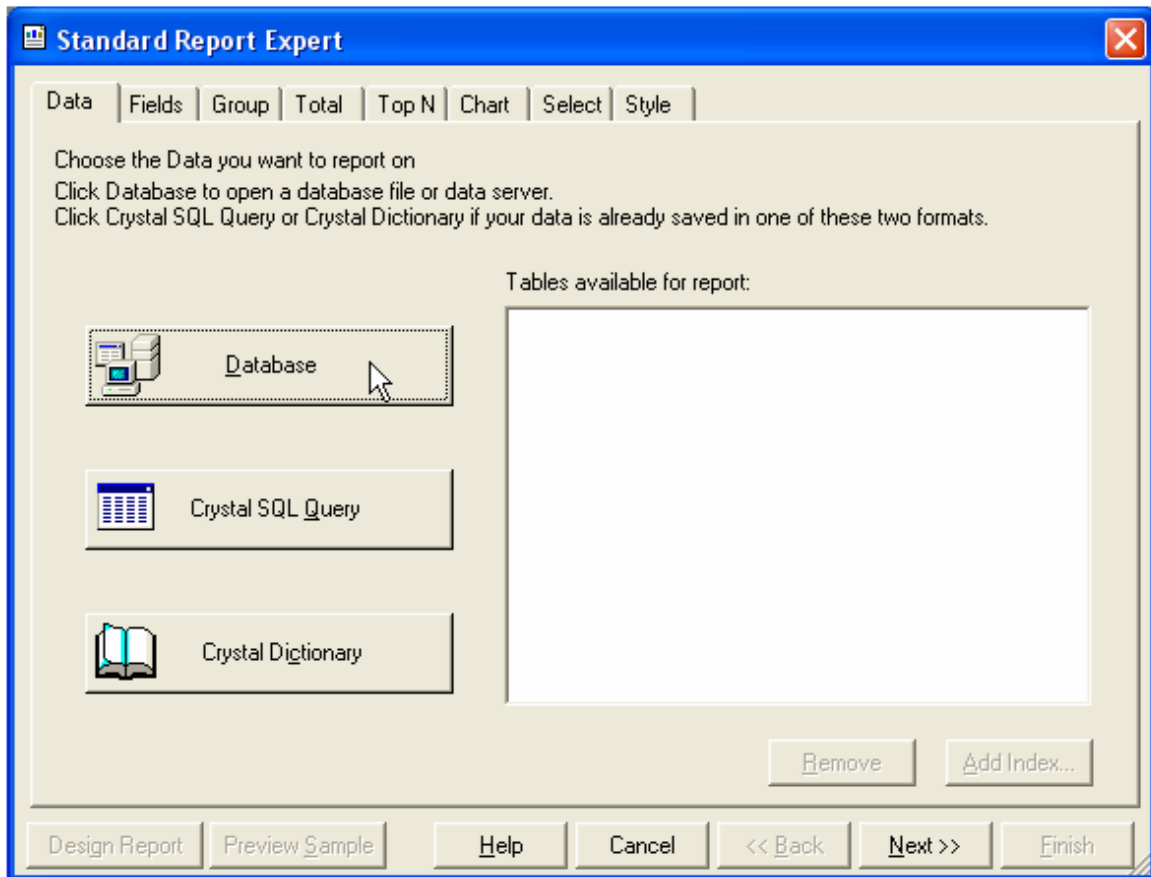

Pilih standart

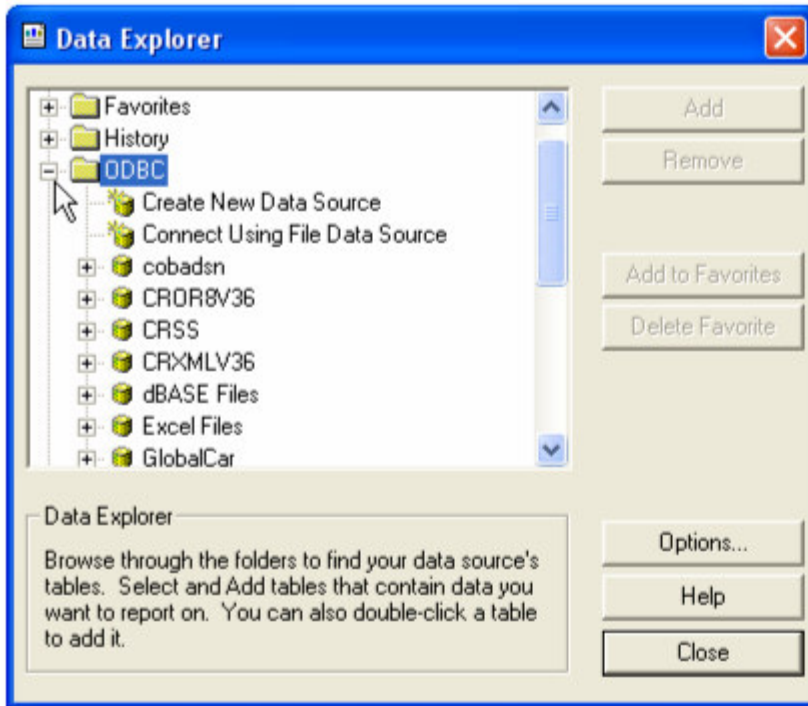

Klik OK

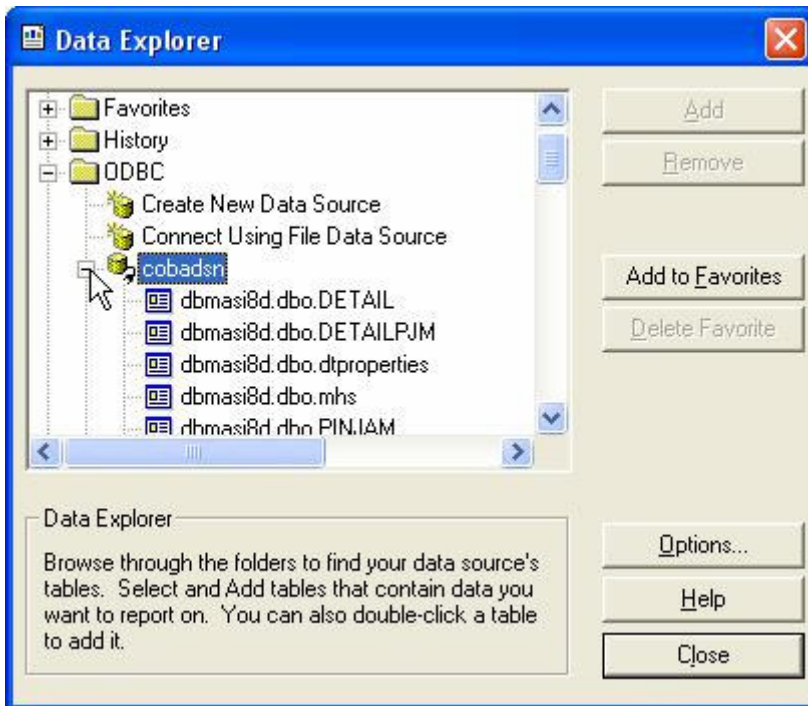

Klik command database

Buka folder ODBC

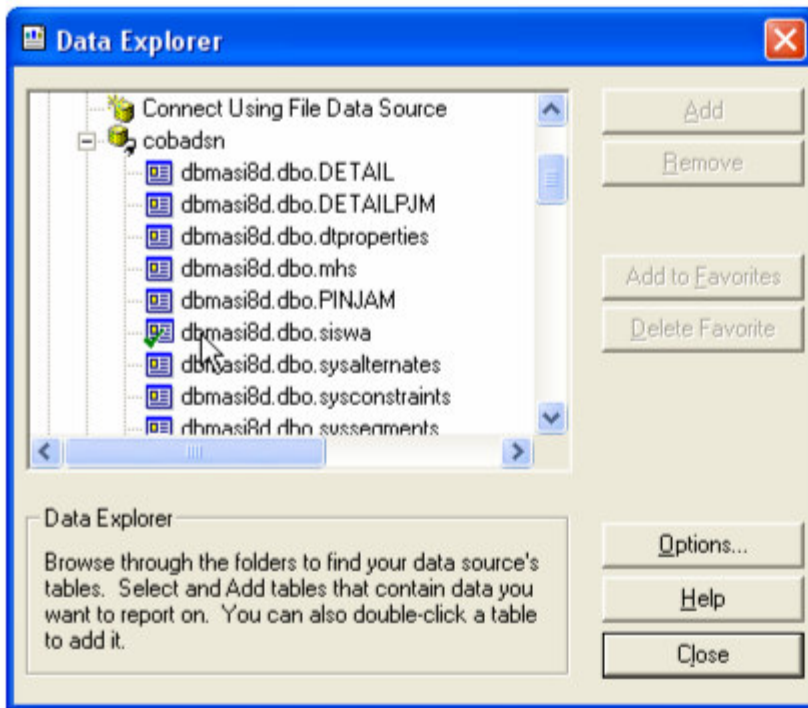

Buka folder koneksi cobadns

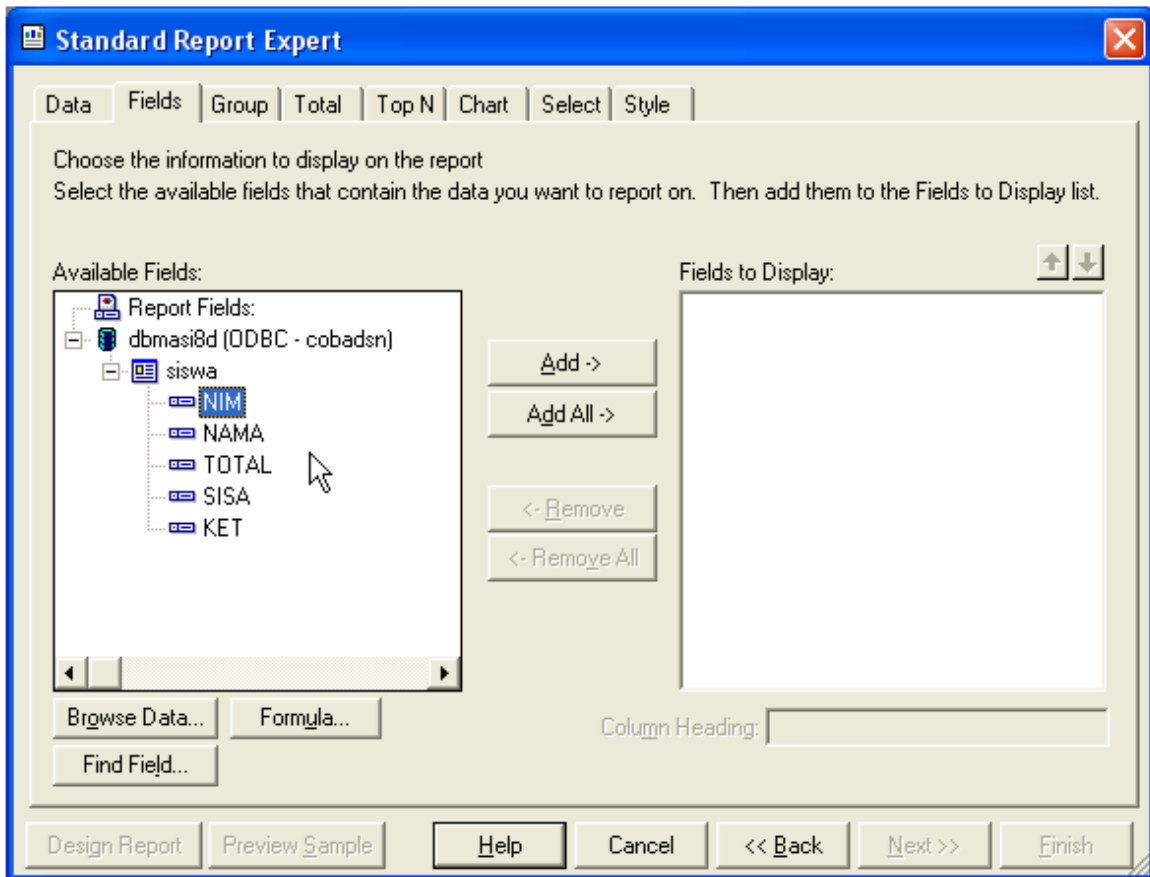

Klik dua kali tabel yang akan dibuat laporan

Klik close

Pilih nama-nama file yang akan dijadikan laporan

Klik next beberapa kali hingga sampai ke finish

Simpan laporan

Panggil laporan dengan VB (jangan lupa menambahkan componen crystal report control di dalam form
